You must maintain a minimum average daily balance of \$0.01 to obtain the disclosed annual percentage yield.

The average balance is calculated by adding the balance in the account for each day of the period and dividing that figure by the number of days in the period. The period we use to make this calculation is monthly.

DORMANT/INACTIVE ACCOUNT INFORMATION. A dormant account fee of \$10.00 per month will be charged after 12 months of inactivity.

PROCESSING ORDER.

Credits always post first. Then post by Check #, in order by serial number ascending. Transactions with a check number equal to ZERO (0) will post first in transaction amount order, low to high, before transactions with check numbers. The processing order of these items is important because if there is not enough money in the account to pay for the items in the order they are processed in accordance with the processing order, there may be an overdraft on your account which may result in overdraft or non-sufficient funds fees or an increase in the amount of these fees.

BALANCE COMPUTATION METHOD. We use the average daily balance method to calculate interest on your account. This method applies a periodic rate to the average daily balance in the account for the period. The average daily balance is calculated by adding the principal in the account for each day of the period and dividing that figure by the number of days in the period.

The average daily balance that we use when calculating interest is the collected balance. That means we only include those funds for which we have actually received payment when we determine the average daily balance on which interest is paid.

ACCRUAL ON NONCASH DEPOSITS. Interest will begin to accrue on the first business day after the banking day you deposit noncash items (for example, checks) into your account.

TRANSACTION LIMITATIONS. No transaction limitations apply to this account.
